

Summarized Geology of Ethiopia

MINERAL RESOURCES OF ETHIOPIA

The Precambrian Basement

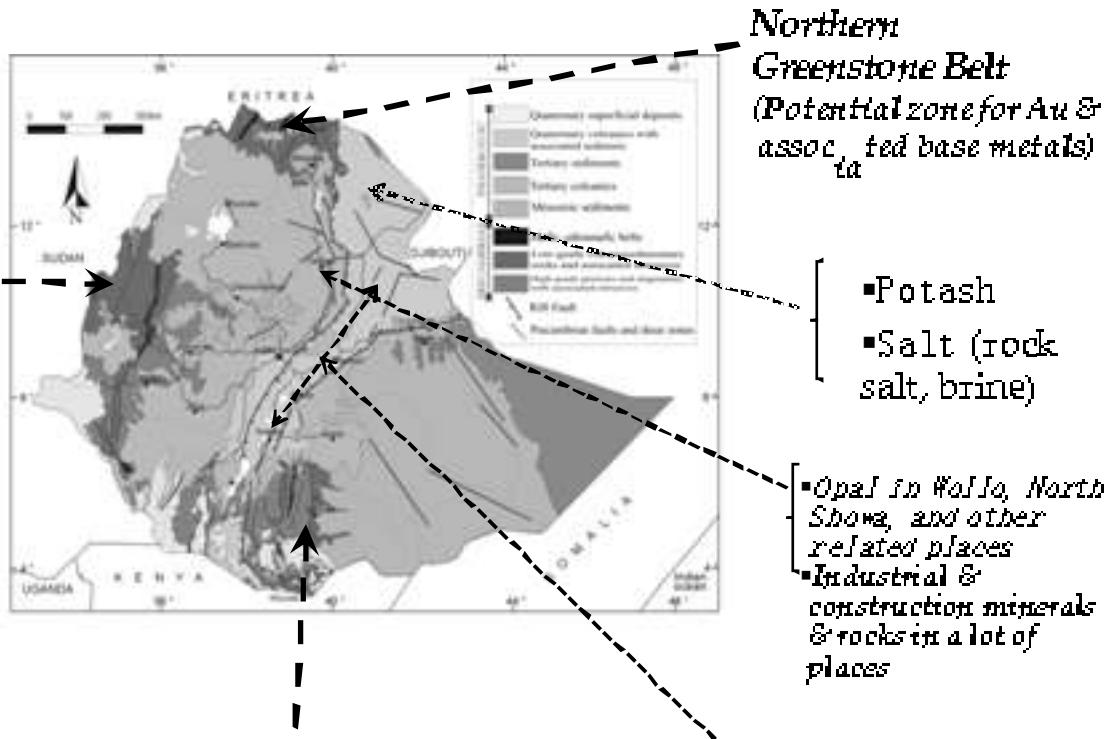

- Gold & base metal, PGE, Rare metals, Ferrous metals
- Refractory raw materials (Graphite, Kyanite and Talc)
- Construction raw materials (Marble, Dolomite & Granite)
- Ceramic raw materials (Kaolin, Quartz and Feldspar)
- Agro-minerals (Phosphate)
- Gemstones

Late Paleozoic to Mesozoic Sedimentary Succession

- Cement raw materials (Limestone, Gypsum & Clay)
- Dimension stone (Sandstone)
- Natural oil and gas

Mineral Resource Potential Belts/Domains of Ethiopia

Western Greenstone Belt (Potential zone for Au & associated base & ferrous metals)

Southern Greenstone Belt
(Potential zone for Au & associated base & rare metals)

Geothermal Potentials
(mainly from Lake Chamo - Dabat)

- Potash
- Salt (rock salt, brine)

- Opal in Wollo, North Shewa, and other related places
- Industrial & construction minerals & rocks in a lot of places
