

An Inauguration Ceremony for “The Project for Introducing Medical Equipment to Test for Breast Cancer, Ayder Comprehensive Specialized Hospital, Mekelle, Tigray”

On 17 December 2018, an inauguration ceremony for “The Project for Introducing Medical Equipment to Test for Breast Cancer, Ayder Comprehensive Specialized Hospital, Mekelle, Tigray” under the Grant Assistance for Grassroots Human Security Project (GGP) was held at Ayder Hospital, College of Health Science of Mekelle University. Through this project, which is the first GGP project with Mekelle University, mammography equipment, manufactured by FUJIFILM with sophisticated technology, was provided to Ayder Comprehensive Specialized Hospital. Through this GGP project, the first digital mammography machine was introduced in Tigray Regional State, and women living in Tigray and surrounding areas will be able to have improved access to breast cancer screening.

At the ceremony, after the remarks by Ambassador Daisuke Matsunaga and President Higuchi of FUJIFILM Middle East, the acknowledgment was given by President Kindeya of Mekelle University.
