

Orientation about Japanese Culture to Ethiopian Students

On 14 June, an orientation on Japanese culture was held for students of Sandford International School in Addis Ababa. Fourteen students who are going on a school trip to Japan participated in the orientation, and our embassy staff introduced Japanese history, culture, Japanese language, food, arts, music, architecture, characteristics of each city, and manners unique to Japan, to deepen their understanding of Japan. There was also a quiz session about Japan, and the students seemed to enjoy it. We hope that children who are interested in Japan will become bridges that contribute to Japan-Ethiopia friendship in the future.
